Minority Report
DENTAL AUXILIARY EDUCATION

1981/82

SUPPLEMENT 1
TO THE
ANNUAL REPORT 1981/82
DENTAL AUXILIARY EDUCATION

The information contained in this supplement to the Annual Report on Dental Auxiliary Education, 1981-82 is taken from the survey of all accredited dental auxiliary programs in the fall of 1981.

Tables 1 and 2 provide summary trend data of enrollment by sex and ethnic minority. In Table 1, one can observe in the last five years the number of men enrolled in dental hygiene has been fluctuating around the one percent point, while the number of men enrolled in dental assisting programs have increased slowly. But in both cases, slightly more than 98% of the students in these programs are women. Female students are also steadily gaining ground in the dental laboratory technology programs. If the present trend continues in 1984 women would account for more than 50% of the students enrolled in the dental laboratory technology programs.

Table 2 indicates that the number of students from ethnic minorities continued to increase steadily in all three dental auxiliary programs. The largest increase in percent is in the dental laboratory technology enrollment.

It should be noted that a few programs were unable to provide ethnic minority and sex breakdowns for their student enrollment. The statistics given in this report, therefore, are based on the total enrollment of programs which did provide minority and sex information.
